Abstract not available for JP11512399T

Abstract of corresponding document: **WO9709315**

Compounds having utility as anti-inflammatory agents in general and, more specifically, for the prevention and/or treatment of immuno-inflammatory and autoimmune diseases are disclosed. The compounds are pyrimidine- or pyrazine-containing compounds and, in one embodiment, are carboxyamides of the same. Methods are also disclosed for preventing and/or treating inflammatory conditions by administering to an animal in need thereof and effective amount of a compound of this invention, preferably in the form of a pharmaceutical composition.
